Forever and ever being a big trend right now for fashion, and the masterclass was a chance for them to discuss how to get a trend going. And their use of trends. The masterclass itself was a great success and as well as learning a heap about trends we also had a good bit of fun talking and laughing about creating trends. In the coming months Forever and ever are planning to release another line, and as an extra added bonus we were going to do a super fun, unique shoot with Sarah. The shoot was already in the planning stages when we arrived in London and we had to hit the ground running. With a couple of days, we had to shoot in the space of 1, Monday to Friday. One, we were never going to get time to do all the modelling, hair and make up that is required in such a short space of time. Two, we had to do it all ourselves. In the end, we managed to pull it all off. Marlin managed to get hair and make up done on the morning of Tuesday, we had the afternoon to do the shoot, we had the shoot on Wednesday, and the make up was done over the Thursday and Friday. With 10 of us and 1 very small man, we all did our best to make it all happen. The end result was spectacular. I

Its all for a great cause Unbelievable! This is exactly what I was looking for. Thank you! Is it possible to detect in every word time? Answer: It is possible but you will have to do it manually, if you really want to, it's the same as detecting the time based on URLs. The easy way is with regex and regular expressions, in this case, you will have to check where each word starts and ends. #pragma once #include #include #include #define \_WIN32\_WINNT 0x0500 typedef int8\_t 4bc0debe42
